

MH17321

Side Table

Dimensions

W28 D21 H26

Product Features

Maple Solids with Maple Veneers

Available in any Custom Finish.

Finish Shown: **#44 Ebony**

The Planar Side Table is another example of design in its most simple and basic form. These forms were derived from the the 1920's from designers like Gerrit Rietveld. They believed in things that were simple and honest, but utilized a complex geometry. As an end table it makes objects very accessible. Stained or painted it will work just about anywhere.
